

ROBOTIC COLORECTAL SURGERY

In addition to traditional surgical technique, we specialize in minimally invasive colon and rectal surgery using state-of-the-art laparoscopic and robotic technology, utilizing the *da Vinci*® Si & Xi surgical systems. This results in smaller incisions in comparison to traditional access, with the goal of less post-operative pain and faster return to normal activities.

Robotic surgery offers the following potential benefits:

- Less pain
- Shorter hospital stay
- Quicker return of bowel function
- Quicker return to a normal diet
- Faster recovery
- Small incision for minimal scarring
- Lower conversion rate vs. laparoscopic surgery
- Quick return of urinary function
- Quicker return of sexual function

Incision

Robotic surgeries can help treat colorectal conditions including:

- Colon cancer
- Rectal cancer
- Diverticulitis
- Ulcerative colitis
- Crohn's disease
- Rectal Prolapse

MEET THE SURGEONS:

Graham Sellers, MD

Medical School: The Mount Sinai School of Medicine 1992

Residency: Columbia Presbyterian Medical Center 1997

Fellowship: Orlando Regional Medical Center 1998

Board Certifications: Colon & Rectal Surgery

Specialties: Colon & Rectal Surgery, Colon & Rectal Cancer, Colonoscopy

Craig Brown, MD

Medical School: University of Colorado School of Medicine 1996

Residency: University of New Mexico Health Sciences Center 2001

Fellowship: Creighton University 2002

Board Certifications: Colon & Rectal Surgery, General Surgery

Specialties: Colon & Rectal Surgery, Colon & Rectal Cancer, Colonoscopy

Warren Strutt, MD

Medical School: Saba University School of Medicine 2006

Residency: Stamford Hospital/Columbia College of Physician & Surgeons 2012

Fellowship: Colon & Rectal Surgery and Minimally Invasive Surgery Orlando Regional Medical Center 2014

Board Certifications: Colon & Rectal Surgery, General Surgery

Specialties: Colon & Rectal Surgery, Colon & Rectal Cancer, Colonoscopy

Noelle Bertelson, MD

Medical School: University of Washington School of Medicine 2004

Residency: Rush University Medical Center 2009

Fellowships: Mayo Clinic 2011; Cook County Hospital 2013

Board Certifications: Colon & Rectal Surgery, General Surgery

Specialties: Colon & Rectal Surgery, Colon & Rectal Cancer, Colonoscopy
